

## Hair regrowth formula invented

Renowned consultant at Apollo Spectra hospitals Dr. Debraj Shome has invented a revolutionary formula for hair regrowth.

He is the first Indian doctor to invent this revolution called the QR678. This formula is proving to give amazing results in hair growth. This injectable molecule is a treatment for hair loss and stimulating hair growth. It has a mixture of specific hair regrowth factors and ingredients. For this invention, the researchers Dr. Debraj Shome and Dr. Rinky Kapoor have received the prestigious US patent from the US patents and trademarks authority.

Dr. Shome says that till date the only option for hair loss was considered hair transplant but it is painful, needs repetition, and may not give the desired results many times. The QR678 therapy is a non-surgical and very economical treatment.
